

HAI presents:

Mountain Flying Ground School at HELI-EXPO 2013

Flying in the mountains is a different experience than flying in any other environment. Reduced engine power, decreased lift, hypoxia, terrain, and treacherous winds and weather all pose serious challenges to pilots. This ground school, taught by instructors from Rota Aviation Training, the mountain / high-altitude training school with the highest airport (9,927 ft.) in the continental United States, will provide attendees with the fundamental and advanced concepts necessary to fly safely in the mountain and high-altitude environment.

Topics that will be addressed in this course include — Mountain geography and features, such as ledges, glaciers, snowfields, and canyons Altitude physiology and pilot human-factors for this environment, and optical illusions Mountain flying operations and how factors such as wind, weather, and altitude impact aircraft and engine performance Unique features of mountain landing areas and contour crawl Flight planning, managing risk, and high-altitude emergency procedures Mountain survival and preparedness Registration is available at <http://www.rotor.com/Events/HELIXPO2013.aspx>. Seats are limited. On-site registration is based on availability.

Event Details

Mon, Mar 4, 2013 - 8:00 am
Las Vegas Convention Center
3150 Paradise Road
Las Vegas, NV 89109
